

## Hydraulic breakers

B, H and V Series

\*Equipment photos are only referencial.

### **B Series**

Carrier equipment: 1.5 - 70 t.  
Nitrogen-type.  
Superior impact energy.  
Optional automatic lubrication.

### **H Series**

Carrier equipment: 0.7 - 80 t.  
Accumulator-type technology.  
Compact range:  
-Light, simple and built for reliability.  
From 9 t.:  
-Powerfull.  
-Two speeds.  
-Automatic greasing system.

### **V Series**

Carrier equipment: 18 - 120 t.  
Accumulator-type technology.  
Fully automatic variable speed (15 speeds).  
JMHB 230V-1 to JMHB1270V-1 with automatic greasing system.  
Maximun productivity.

# Walk-around

Komatsu hydraulic breakers have been designed to work with precision and quality in every Series. They provide superior impact energy in a wide variety of applications, and high adaptability according to the working conditions. Regardless of the context, their performance is outstanding in all kind of tasks.

## B Series

- Nitrogen-type.
- Superior impact energy.
- Optional automatic lubrication.

## H Series

- Membrane accumulator.
- Compact version:
  - Lightweight and user-friendly.
- Greater size: (from 9 t.):
  - More power.
  - Two speeds.
  - Automatic greasing.

## V Series

- Membrane accumulator.
- Automatic impact speed selection (15 speeds).
- JMHB 230V-1 to JMHB1270V-1 with automatic greasing system.
- Maximum productivity.

## Select the right tool for the job

Use the correct tool is the first step to obtain maximum life and performance from the breaker. It will also decrease overall running costs and increase productivity.

### Pyramid

- Application: secondary breaking, demolition, mass excavation.
- Material: low and medium hardness, homogeneous structure.

### Chisel

- Application: trenching, mass excavation.
- Material: low and medium hardness, non-homogeneous structure, abrasive.

### Blunt

- Application: secondary breaking.
- Material: high hardness, abrasive.

### Moil point

- Application: secondary breaking, demolition, mass excavation.
- Material: low and medium hardness, non-homogeneous structure.

### Specials

- Uniquely designed tools are available for special applications, such as extremely abrasive material, soft material or tunneling.

# B Series hydraulic breakers

## Simple, powerful, reliable

- Komatsu B Series hydraulic breakers provide superior impact energy and breaking force in any application. The simplicity of their design combined with high quality components give you breakers that can fit on any machine, and work under any condition, for many years. With up to 30% less components, these breakers require little maintenance, are easy to service and propose market-leading reliability.
- The optional automatic lubrication can extend their lifetime even further.

## JTHB60-3

- Specifically designed for WB93/97.

## Heavy-duty housing

- Extremely tough and wear-resistant housing on every single model!

### Fully suspended, silent

- The fully suspended power cell dampens shockwave transmission, increasing operator comfort, reducing noise and protecting the carrier.

### Accumulator-free technology

- The integrated nitrogen gas cushion absorbs the piston recoil energy and recycles it for the next blow. High quality seals prevent ill-timed and frequent refills!

### Two moving components

- To keep operating and maintenance cost down, these breakers feature 30% fewer parts than their competitors - and every single one of those parts is designed to Komatsu's strict engineering and quality standards. This means fewer parts need to be replaced, repairs are straightforward, reliability is unbeatable.

### Optional automatic lubrication

- Protege su inversión al ofrecer un engrase continuo, lo que extiende la vida útil de los bujes y del martillo.

### High quality tools

- Komatsu Genuine tools are much more than just machined pieces of steel. The best alloys guarantee a long wear life. Delicate heat treatment result in a faultless and tough product. Careful and precise heat treatment ensure the piston impacts the tool at the right moment for maximum energy transfer.

### B Series

Carrier equipment: 1.5 - 70 t.  
 Nitrogen-type.  
 Superior impact energy.  
 Optional automatic lubrication.

# H Series hydraulic breakers

## An ace up their sleeve

- 15 new models join the Komatsu hydraulic breaker range. Based on accumulator-type technology, these breakers deliver consistent impact power in any environment, on any machine. Innovative features and clever design improve production while lowering the total cost of ownership significantly.

## Compact range

- 8 breakers, from 0.7 to 12.0 t, cover the utility and midi excavator segment. These breakers are designed with a compact and light body, improving machine stability, operator visibility and comfort. The inside is simple and reliable: no tie rods, but with high quality components, automatic pressure regulation, high back pressure tolerance and blank firing protection.

## Large range

- 4 heavy-duty breakers designed to obliterate any material in their path. Suitable for carriers between 20 and 80 t, these breakers will automatically adjust their working frequency depending on the hardness of the material. Other features? Heavy-duty housing and build, automatic greasing, blank firing protection, swivel hose couplings, field-replaceable bushings, overflow protection, adjustable pressure regulation, and more.

### Automatic greasing system

- Breakers from JMHB130H-1 to larger models include automatic greasing system.

### Swivel hose coupling

- Extends hose lifetime.

### Nitrogen accumulator

- Constant power over time.
- No need of nitrogen refill.

### Large diaphragm accumulator

- Full power, day after day, with no need to refill nitrogen. Smoothens pressure spikes, protecting the carrier.

### Advanced blank firing protection as standard

- Protect your investment! Piston movement is not interrupted, but impact is prevented by a hydraulic brake. Saves time and money.

### High back pressure tolerance

- The H Series utility breakers can work on any machine, thanks to their high tolerance for back pressure.

### Pressure regulator valve

- Maintains a constant operating pressure, providing powerful impact strokes, whatever the conditions. On some models, the valve can also divert up to 15% of excessive flow, protecting the breaker from damage.

### Compact and light housing

- The H Series utility breakers are incredibly compact, enabling better operator visibility and greater stability and comfort.

### Fully suspended, silent

- The fully suspended powercell reduces shock wave transmission, resulting in higher operator comfort and less noise.

### Automatic greasing system

- From JMHB130H-1 to larger models, automatic greasing system is included, which continuously provides the optimal amount of grease to the breaker.

### Automatic 2-speed selection

- From model JMHB220H-1 to JMHB660H-1, the breakers have two different impact rates, which are automatically set depending on the rock condition, increasing productivity.

### Swivel hose couplings

- The hoses are connected on articulated couplings, allowing them to move freely, for less breakage risk and a longer lifetime.

### Right tool for each job

- Standard: moil point, pyramid, chisel or blunt tool.
- Specials: special tools are available for dust extraction, super abrasive applications or work in soft ground.

### H Series

Carrier equipment: 0.7 - 80 t.

Accumulator-type technology.

Compact range:

-Light, simple and built for reliability.

From 9 t.:

-Powerfull.

-Two speeds.

-Automatic greasing system included in larger models.

# V Series hydraulic breakers

## Unrivalled productivity and lowest cost per ton

- Komatsu V Series breakers are designed for maximum productivity in any application, whilst lowering cost per ton. Works well with all types of applications, for demolition, mass excavation or secondary breaking.
- They fully modulate their impact force and frequency to match the application's requirements, with no wasted energy and, therefore, with a much higher operating efficiency. A patented valve recuperates energy and further improves this efficiency.
- As with the H Series, many features such as the automatic greasing, advanced blank firing protection, swivel hose couplings and heavy-duty housing are standard. In addition, patented bushing protects the tool and retaining pins by absorbing any torque on the tool.

300% energy variation in 1s.

## Fully variable technology

- Depending on the application's hardness, V Series breakers automatically select the optimal piston stroke length and speed. By adjusting to either hard material, with long and powerful strokes, or to softer material, with shorter, faster strokes, the highest production output is consistently achieved, with no waste of impact energy.

### **Integrated automatic lubrication as standard**

- Provides continuous greasing, extending the lifetime of the bushings and tool, protecting your investment.

### **Pressure regulator valve**

- Maintains a constant operating pressure, providing powerful impact strokes, whatever the conditions.

### **Fully suspended, silent**

- The fully suspended powercell reduces shock wave transmission, resulting in higher operator comfort and less noise.

### **Large diaphragm accumulator**

- Full power, day after day. Smoothens pressure spikes, protecting the carrier.

### **Swivel hose couplings**

- The hoses are connected on articulated couplings, allowing them to move freely, for less breakage risk and a longer lifetime.

### **Patented overflow protection**

- These breakers are protected from accidental flow adjustments thanks to a patented overflow protection system.

### **Energy recovery valve**

- More than 90% energy recovery, making them the most efficient breakers in their class.

### **Advanced blank firing protection as standard**

- Protect your investment. Piston movement is not interrupted, but impact is prevented by a hydraulic brake. Saves time and money.

### **Tool protection system**

- Torque on the tool is absorbed by the bushing, instead of the retaining pins. In combination with bronze bushing, this dramatically extends the tool's lifetime.

### **The right tool for the job**

- Choice of various tools for each type of application:
  - Standard: moil point, pyramid, chisel or blunt tool.
  - Specials: special tools are available for dust extraction, super abrasive applications or work in soft ground.

### **Fully variable automatic speed selection**

- Enabling the highest production in any application, these breakers can select exactly the right amount of power to break through the material.

### **V Series**

Carrier equipment: 18 - 120 t.

Accumulator-type technology.

Fully automatic variable speed (15 speeds).

JMHB 230V-1 to JMHB1270V-1 with automatic greasing system.

Maximum productivity.

# Models

## B Series hydraulic breakers

Model	Unit	JTHB08-3	JTHB10-3	JTHB20-3	JTHB30-3	JTHB40-3	JTHB50-3	JTHB60-3	JTHB70-3	JTHB120-3	JTHB160-1
